

As an extension of your Staff, Trojan Has Been Making Your Work Easier For Over 30 Years!

Think about it. While we're dealing with insurance companies, your staff is filling holes in the hygiene schedule and booking that bridge for you!

| Benefits 500+ |

Over 43,000 insurance benefits plans for your patients from close to 10,000 of the nation's largest employers...accessible from your keyboard, plus the research service Trojan is famous for delivering!

Take a moment to consider how much time your staff spends on the phone or Internet gathering insurance information for all your patients. Wouldn't you rather spend time more wisely? We already know the answer.

Why not check out **Benefits 500+** and see how you can have dental benefits available to you from your keyboard? It's true. You'll have access, right from your keyboard, to over 43,000 insurance benefits plans from close to 10,000 of the nation's largest employers. And yes, **Benefits 500+** program keeps all of these benefits up-to-date!

Benefits 500+ Provides Your Office

- Listing of group benefits for your insured patients
- Call-in service to request additional benefits
- Assistance with questions regarding CDT codes and usage
- Timely assistance from our skilled customer service staff
- Free updates
- Integration with most practice management systems
- Automatic population of family files without having to retype

Here's how it works:

Our staff works as an extension of your staff. You are initially provided with tens of thousands of large employer plans that are accessible through your practice management software. Simply type in the company they work for, locate your plan and link it to the patient's record. Each subsequent update will automatically reflect changes to the plans Trojan has researched. If you don't see the plan you are looking for, simply delegate that task to Trojan. We will contact the payer, obtain and return the benefits to your office. You will also receive an update allowing you to link that plan to your patient.

We'll get your patient's benefits for any large employer (500 employees or more). You will have plan benefits for over 70%* of your patients...at your fingertips. We'll also customize your personal database of small employer benefits for a small fee. Regardless of the size of the employer, researched benefits are added to your database for you to see anytime you want. And yes, **Benefits 500+** keeps all of these large plan benefits up-to-date!

What else? Trojan has been integrated with top practice management software companies for years. Integrations allow you to link the benefits to your patient's file. This populates your patient's treatment plan based on their benefits!
